

# Terrazzo & Marble Care

523

## **523 CR-2 Crystallizer for Marble and Terrazzo Surfaces**

It provides a high level of lasting and resistant shine at first crystallizations, being able to be used later for a regular maintenance of shine on previously crystallized floors. To be used directly after polishing or after the application of CR-1 base crystallizer when necessary. In maintenance works, it must be used directly without any other previous procedures except the regular cleaning of the surface to be treated.

516

## **516 Lucidox**

Special product used to shine small surfaces such as skirting boards, corners and edges that cannot be reached by the polishing machine, and also for walls and vertical surfaces.

503

## **503 Gialotex**

It is our most popular shining powder, because it can be used on a wide range of marble and terrazzo surfaces. Gialotex is considered a "general purpose product" providing the highest level of shine on most of the existing marbles and terrazzo
